

DetectaChem

Accuracy, Mobility and Reliability

DetectaChem is a privately-held company and manufacturer of the rapidly deployable, handheld, intelligent, and easy-to-operate detection system called the Seeker. The Seeker enables threat detection for safety and security operations throughout the world. DetectaChem products are simple to use and maintain, yet are sophisticated in function and design. The Seeker utilizes proprietary patent pending technology to deploy automated colorimetric analysis of extremely small traces of explosive and narcotic materials. The company has developed a proprietary card collection system that is used to initiate the colorimetric reaction.

The Seeker uses processes related to color reactions, that have traditionally been used in the field of molecular analysis. This liquid chemistry based approach enables the Seeker to rapidly perform on-site diagnostic detection of explosive and narcotic materials, utilizing well established parameters. DetectaChem products are multi-lingual allowing for global deployment.

Our Customer Satisfaction Commitment

DetectaChem is committed to providing customers with superior products, services, and support. The overall experience begins with the development of high-quality products and continues with support services that exceed customer expectations. We do this because we believe customer satisfaction is the ultimate measure of our organization's performance. Accordingly, our team strives to include the customer in every aspect of our business. We also employ a business-partnership model that is designed to assist in identifying the unique needs of every customer to ensure that all expectations are satisfied.

Our Mission

DetectaChem's mission is to provide all users the very best handheld explosive and narcotic detection products available.
