

EL-0078-002

The EL78A is a mediating communication device between PC and ELID controllers for a small scale networked configuration on an Ethernet local area network. The communicator converts TCP/IP to Multi-drop/RS422/RS232 signals or vice versa.

- Conversion circuitry: 1x Multidrop/RS422/RS232 to 1 x TCP/IP interface
conversion circuitry
- Software Key slot: None
