MDU V is a remote control module with transmitter with rolling code. The module has 4 operation modes and can work with up to 15 remote controls. Comes with 1 remote control in the kit.

Technical Specifications

Operating voltage 10 - 14.5VDC
Current consumption when relay is off . . . 6mA
Current consumption when relay is on . . . 15mA
Current/Voltage of switch. 3A/60V
2 channel relay contacts max. rates 20A/75VDC; 20A/60VAC
Maximum range of remote controls 80m
Maximum number of remote controls 15
Operating temperature -20°C / +80°C

Functional Specifications

- One channel
- LED indication for switched on relay
- 4 working modes
- Relay output
- Up to 15 remote controls
- Option to prohibit a lost remote control
- Rolling code

Packing Information

- **Master box** - 150 units MDU V, dimensions 500 x 367 x 230 mm

Compatible Product Range

- **CA 62** - Intruder Alarm Panel
- **VEGA6/ VEGA6 RF** - Intruder Alarm Panels
- **ECLIPSE series** - Intruder Alarm Panels
