

A COMPACT DESKTOP
X-RAY INSPECTION SYSTEM

This small and light desktop X-ray inspection system is designed for quick and effective use where small bags and parcels need to be screened.

The system can be supplied with or without a cart stand on and can be easily moved between locations with a weight of 160 kgs.

The unique touch screen software interface is designed to give the operator a simple operating process with optional threat detection assistance software.

CONCEPTUAL DESIGN

BV 5030CA
