

Features:

SP-300H hand-held metal detector is a multi-functional hand-held metal detector produced by “shogun xie technology” in Shenzhen, China. It is a high performance metal detector in China. Widely used in bus stations, railway stations, tourist attractions, electronics factories, Jewelry factories and other public places, to provide us with a safe working environment. MD3003B1 is one of the high-end products in the hand-held detector. Automatic detection on start-up, no adjustment, large scanning area, fast and accurate detection can be completed; with ultra-high sensitivity, it can detect very small metals, such as mobile TF memory card, pin, razor blade, etc., so it is purchased by

Technical standard	Technical parameter
Product dimension	415mm x 85mm x 45mm
Packing dimension	520mm x 100mm x 50mm
Working bands	About 25 KHz
Net weight	400 (exclude battery)
Power supply	Standard 6F22/15F8H 9V battery or chargeable battery
Operating temperature	-15°C to +55°C
Power	270MW
Packing	25pcs/box
