

HS-104

Remote Indication LED

Specifications/Special Features

- They work perfectly with all conventional intelligent fire control panels
- The HS104 is a Conventional Remote Indication LED which connects to a detector to show the alarm conditions on a bright Red Colour LED
- Optional white or red color cover
- Supports European and USA standards at the same time
- Modern style
- Operating Voltage: DC3V
- Operating Current: 20mA

- **WARNING:**

1. Power input terminal is polarity.
2. Connect to specified detector only. It would be necessary to connect a limiting resistor in series with a DC power supply
