PD2100AB

Digital keypad module Alba –PD2100AB

Digital keypad module of Alba range. It allows to call the internal unit through the coding of the corresponding number and door opening through reserved code. Stand alone for **access control,** the module can be combined in Duo Systems with display module, **CA2144AB audio module or CV2144AB audio-video module** or combined **with myCom AB3G** module**.** The selection if standalone or combined with Duo or myCom module is to be made easily through jumper. Backlit module with white high readability LED's, PD2100AB includes high visibility big buttons. Supplied with 2 relays on board, it manages up to 1000 codes each relay. If it is combined with Duo audio or audio-video module, it allows to manage the 2 internal relays and even other Alba modules and can enable even remote relays (for example art. 2281Q). If the module is combined with XE2921, the keypad can use a **system clock**: access control functions can be timed. Manual or via **Bluetooth** programming (XE2920 or XE2921 is required).

MAIN CHARACTERISTICS

material: **aluminium**

mounting:
wall mounting: **yes**
flush mounting: **yes**

colour: **grey**

button number: **12**

LED signaling: **yes**

IP degree: **55**

working temperature range: **-25° / +50°C**

back-lighting colour: **white**

actuactions number: **6**

FUNCTIONS

actuator activation: **yes**

home automation function: **yes**

door opening confirmation: **yes**

system status: **yes**

door opening button: **yes**

TECHNICAL FEATURES

supply voltage: **13 Vca or Alba bus**

DIMENSIONS

height cm **9.9**

width cm **9.1**

depth cm **0.9**
