# features

- Industrial construction
- Terminal block wiring
- Ultra-bright LED
- Suitable for analogue addressable or conventional systems.

The RI/W/3V remote indicator unit is designed for fire detection systems requiring local indication of an individual or group of fire detectors in alarm. The unit is fitted with LED providing a wide area of illumination and high on/off contrast for easy viewing.

The range is suitable for both analogue addressable and conventional Fire Alarm Systems with three terminals simplifying connection to either type of system.

electrical

Input voltage   5 to 28 Vdc
Current   dependent on voltage

For conventional systems connect across load resistor (terminals 1 & 3)

For most intelligent systems connect across LED (terminals 2 & 3)
